JAGADEESH B R

+91 7026170918 ⋄ jbr18.inbox@gmail.com

PROFESSIONAL SUMMARY

AI-ML student proficient in Python, SQL, Pandas, NumPy, Tableau, and Machine Learning. Passionate about data-driven problem solving and analytics in fast-paced environments.

EDUCATION

Bachelor of Engineering in Artificial Intelligence and Machine Learning 2023 - 2026
RNS Institute of Technology,Bengaluru, Karnataka
CGPA: 8.0/10

Diploma - Mechanical Engineering 2023
PES Polytechnic, Bengaluru, Karnataka
CGPA: 9.23/10

Class X 2020
V V N High School, Bengaluru, Karnataka
Percentage: 73.4%

TECHNOLOGIES

Languages: Python, SQL

Machine Learning: Scikit-Learn, NumPy, Pandas

Deep Learning: PyTorch, Computer Vision

Tools: VS Code, Jupyter, Git, GitHub

Other: Docker, Tableau

PROJECTS

VisionLeaf AI

· Developed an AI powered system to detect diseases in medicinal plant leaves using deep learning and computer vision techniques. Implemented a fine tuned MobileNetV2 model trained on a custom dataset covering 25 disease and healthy classes across seven medicinal plants. Achieved 94.87% test accuracy and deployed the model through a Gradio based web application that provides real time disease prediction and treatment recommendations. Designed the system for lightweight, scalable, and real-world agricultural use.

V_Face AI

V Face AI is a real-time face verification application that determines whether two uploaded face images belong to the same person. The system uses InsightFace for face detection and deep feature embedding extraction, OpenCV for image preprocessing, and cosine similarity to compare facial embeddings. A Gradio interface provides an intuitive web application where users can upload two images, receive a similarity score, and view the final verification result with confidence.

LANGUAGES

Kannada, English, Hindi
